

MINIATURE ROSE PLANT NAMED 'MEIMIROS'

Abstract of the Disclosure

A new and distinct variety of rose plant of the Miniature Class is provided which abundantly forms on a nearly continuous basis attractive very double bright Coral Salmon Pink blossoms that well retain their coloration upon maturity. The growth habit is spreading-upright bushy. Very dense dark green semi-glossy foliage is formed that contrasts nicely with the blossom coloration. Plants of the new variety develop well following the rooting of cuttings. The new variety is well suited for pot forcing under greenhouse growing conditions to form a distinctive gift plant.
